Framestore  
Ms. Annie Barlow  
Recruiter  
28 Chancery Ln.  
London WC2A 1LB, UK

Dear Ms. Barlow,

I first became interested in programming in high school. Our school offered a new AP Computer Science class, and I jumped on the opportunity to learn something new. I immediately developed an interest in the subject and have since decided to pursue a degree in Computer Science at the University of South Carolina. For a long time, I've also been interested in the magic of special effects. I love watching worlds come to life on the screen whether they be entirely animated or live actions stories made incredible by effects, I love watching the impossible become real. I'd love to explore a career in which these two fascinations are combined as an Engine Tools Programmer. This allows me to be involved in visual effects by putting my programming skills to use, and I'd love the opportunity to be part of such a well-rounded and renowned company as Framestore. This company stood out to me because it has a genuine passion for content creation, and I can see this passion in the work that this company produces. I would be an honor to have the opportunity to work for such a company.

Until now, I have studied programming at the University of South Carolina and have developed several programs on Eclipse. I've also spent a period working at Chick-Fil-A, in which I developed a series of soft skills. Most prominently, I learned to work as a team, especially under pressure to deliver orders quickly and efficiently. To do this, it was important to develop our communication skills, as communication is necessary to ensure that every part of the team understands what to do. In my time working there, our order accuracy and speed each increased to 99%, as we all worked hard every day to raise our standards.

With my educational background in programming, I know I have the skills necessary to be a valuable asset at Framestore. My background of working at Chick-Fil-A has given me the teamwork and communication skills necessary to efficiently work with other employees, both in my department and among other departments. I look forward to the opportunity to meet and discuss my resume with you. Thank you for your time and consideration.

Sincerely,

Jane Dalton
