Latrell	Scarborough	latrells@email.sc.edu
Jane	Dalton	jedalton@email.sc.edu
Marshall	Kuriakose	kuriakm@sc.edu

Problem Statement:

Students can get lost too easily in a bigger building or not know what room they need to go to. Additionally, clubs and groups may want to book a room/area but may not know if the space is already occupied by another.

Who does this affect?

College students, and clubs that may have to change their meeting location.

Where is this happening?

While the focus will be on USC Campus, this can be applied to many other campuses

What is the core problem?

Buildings/finding open space for activities can be confusing or difficult to locate.

Why is this important?

This is important because students have gotten lost when attempting to find their class/club meeting location and has resulted in lower performing students or having to find additional time to make up missed content. Additionally, some study/project groups may find it difficult to work on their thing out of class simply because an open location is not known or is already occupied by other students.
